Ensure your internal processes run effectively

With Model N Application Services, you can offload day-to-day application management activities and keep IT teams focused on strategic initiatives. Our high-touch technical services drive adoption and help companies like yours increase ROI, while improving alignment with the business's ever-changing needs.

Through Application Services, you get access to technical expertise, advice, and support from the very people who develop and enhance the Model N solutions. Because we know the Model N platform better than anyone, we can help you streamline integrations, optimize performance and technical operations, and increase business agility.

Core Services

Streamline the daily operation of your Model N platform. Our technical and operational experts ensure applications perform as required and maintain data integrity. Available services include:

- Integration and application monitoring
- Data management and support
- Reports and analytics support
- Maintenance of your existing custom configurations
- Update support
- Service management

Advanced Services

Drive the highest value out of your Model N applications by implementing new business and functional strategies and improving your methodologies.

- Helpdesk support levels 2 and 3
- User administration
- Upstream and downstream system coordination
- New custom configurations
- Integration testing
- Business optimization
- Technical performance optimization

Advanced Testing Services (ATS)

Reduce the time, money, and effort spent on testing. Along with providing access to an out-of-the-box test suite, we configure and maintain scripts that fit your specific controls and requirements. Our team of functional and technical testing resources lead the entire process by authoring, maintaining, and executing scripts; maintaining and refreshing the cloud test environment; ensuring test cases follow your business processes; and securing review and signoff for each test cycle. Should any issues be identified, direct access to Model N's product development team ensures prompt and effective resolution.

ATS Off-Cycle Testing

Reduce the time and cycles required to accept new changes and features into your platform for builds, patches, and hot fixes outside of standard Model N releases – while ensuring adherence to required organizational controls.

ATS System Integration Testing (SIT)

Automate role-based testing and leverage proven test scripts to drastically reduce system integration testing cycles required for seasonal releases through this fully managed, audit-ready testing service.

Maximize revenue and your investment with Model N Expert Services

Model N Application Services is one of the many offerings available through Model N Expert Services. Developed to help you turn revenue management into a competitive advantage, Expert Services delivers the technical, operational, and industry expertise you need to utilize and adopt our applications, streamline processes, and maximize the value of your platform. We continuously evolve our services portfolio to provide solutions that optimize revenue, manage risk, and enable you to focus on innovation.
